

1. Swipe in from the right side of you tablet to the left, so the charms bar pops out.

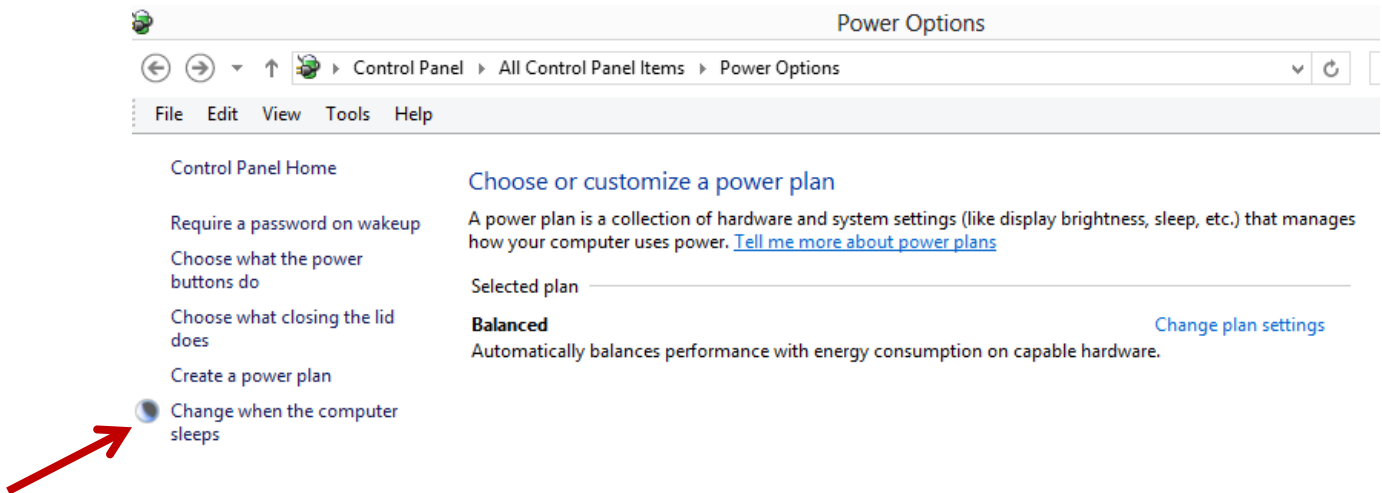

2. Click “Settings”, then “Control Panel”.

If the right hand of the control panel says “View by: Large icons” go to next step. If not, click categories and choose “View by: Large icons”.

3. Scroll down to “Power Options” and click it one time.

4. Click “Change when the computer sleeps”.

5. Change the Plugged in options to “Never Dim the display” and “Never Put the computer to sleep”. Then click “Save changes”.

Change settings for the plan: Balanced

Choose the sleep and display settings that you want your computer to use.

	 On battery	 Plugged in
 Dim the display:	15 minutes 	Never 
 Put the computer to sleep:	30 minutes 	Never 
 Adjust plan brightness:
